

Keep your people safe

Smart24 is an intuitive mobile app for ensuring personal safety. The app lets your team share their location, send messages and flag when they are in danger.

Smart24 allows members of your team to send accurate and encrypted location information to our monitoring platforming via GPRS. This gives you visibility over a dispersed workforce, making it easier to keep your people safe.

In the event of an emergency, people in your care can easily trigger an alert. One time check-ins or heartbeat reports allow people to share information if active tracking is not necessary. The app is compatible with mobile operating systems on iPhone, Android and Blackberry.

Privacy settings can turn off or restrict tracking from within the app when it is not required. We understand that real time tracking is not always needed.

Communicate using the encrypted messaging function, making it easier for members of your team to share critical information.

Respond quickly in the event of an emergency, helping you to ensure the safety of your people.

An easy to use mobile app to help you keep your people safe
